PROFILE

I chose A-level Maths and Further Maths because I love solving problems: working out what a question is really asking, and sticking with it when I'm stuck, asking for help when I need it. Seeing how fast AI was changing technology made me want to use those skills on real software and data, so after my A-levels I took a gap year to build practical skills, then joined Amica Connect Technologies on a work experience placement in December 2025.

What I enjoy most is building focused projects and sharing them with developers and other people who love tech as much as I do. I'm looking for a Level 4–6 tech apprenticeship or entry-level role in data, software development or AI automation in Greater Manchester, where I can work with real clients while studying towards a degree.

SKILLS

DATA	Python, Pandas, NumPy, Scikit-learn, Matplotlib, SQL, Jupyter, Tableau, BigQuery, Astrato	**SOFTWARE**	JavaScript, React, HTML, CSS, Django, Django REST Framework, SQLite
AI AND AUTOMATION	Claude, Gemini (Google GenAI SDK), Composio, prompt engineering, GoHighLevel workflows	**TOOLS**	Git, GitHub, Pytest, Postman, VS Code

EXPERIENCE

Dec 2025 – present

Junior Developer (work experience placement)

Amica Connect Technologies

- Built, tested and deployed an AI-powered Q&A agent for client enquiries. It ran live until the company decided to take it offline.
- Built and maintained CRM pipelines and automated workflows in GoHighLevel.
- Built landing pages and set up domains and DNS records for client websites.
- Worked with marketing and engineering colleagues to troubleshoot technical issues.

16 Oct 2026

Green Circles AI Hackathon

Barclays Eagle Labs, Manchester

Took part in the Green Circles Manchester AI hackathon.

EDUCATION AND CERTIFICATIONS

Oct 2023 – Jun 2025

A-levels · Bolton Sixth Form College

Mathematics (A), Further Mathematics (B), Art and Design (B) · 128 UCAS points

Oct 2022 – Jun 2023

GCSEs · Eden Boys' School, Bolton

Fine Art (9), Mathematics (8), Urdu (8), English Language (7), English Literature (7), Combined Science double award (7, 7)

Certifications

IBM Full Stack Software Developer Professional Certificate · Google AI Fundamentals (Coursera)

PROJECTS

Greater Manchester housing and council tax analysis

DATA ANALYSIS

DATA

Official open data from HM Land Registry and the Valuation Office Agency for Greater Manchester's 10 boroughs.

WHAT I DID

Filtered 90,867 national property sales down to 2,964 standard Greater Manchester sales, and loaded 32 yearly snapshots of housing stock (1993–2024), finding and fixing a double-counting bug along the way.

Stack: Python · Pandas · Matplotlib · Scikit-learn · Jupyter

github.com/sc-freelance/Greater-Manchester-Housing-Property-Council-Tax-Analysis

Engine health monitor (NASA turbofan data)

IN PROGRESS

GOAL

Predicting which aircraft engines need maintenance first, using NASA's turbofan sensor data.

DONE SO FAR

Cleaned 20,000+ sensor readings in Python, flagged each engine as Healthy, Watch or Critical, loaded the data into BigQuery and built a two-page Astrato dashboard.

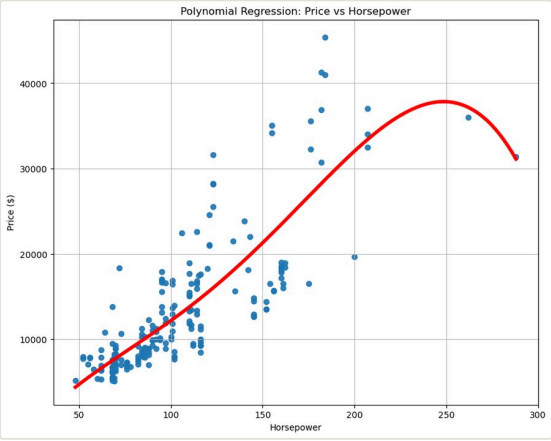

NEXT

A public dashboard link, a machine-learning model to predict each engine's remaining life, and the full write-up on GitHub.

Stack: Python · Pandas · SQL · BigQuery · Astrato

Car price prediction

MACHINE LEARNING

WHAT I DID

Built linear and polynomial regression models that predict car prices, with validation that rejects invalid prices and horsepower values.

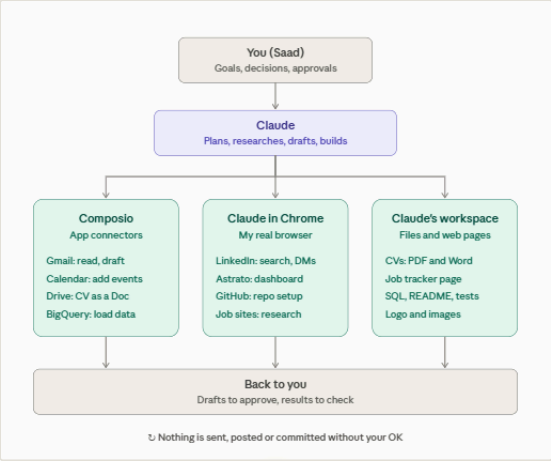

TESTING

Wrote 14 Pytest tests and debugged 7 failures until all 14 passed.

Stack: Python · Pandas · NumPy · Scikit-learn · Pytest

My AI agent workflow (Claude + Composio)

AI AUTOMATION

I use Claude as a personal AI agent for my job search and projects. I set the goal and make the decisions. Claude plans the steps and does the legwork through Composio connectors (Gmail, Google Calendar, Drive, BigQuery) and my own browser (LinkedIn, Astrato, GitHub). On my engine health project, it loaded my cleaned data into BigQuery and helped build the Astrato dashboard. Every email, message and post waits for my approval, and I write and check my own code.

Stack: Claude · Composio · Claude in Chrome · BigQuery · prompt engineering

DevTrack

SOFTWARE DEVELOPMENT

A full-stack app for tracking development tasks: a Kanban board in React, connected to a Django REST Framework API that validates input and powers a live analytics view of task progress.

Stack: React · Django REST Framework · SQLite · Axios

github.com/sc-freelance/DevTrack

Open to entry-level roles and apprenticeships in data, software development and AI automation. I'd love to hear from you.
